

## ERRATUM

As shown in figure 1a and b, the owl identified as a Crested Owl *Lophostrix cristata* (Daudin, 1800) in Rocha & López-Baucells (2014) is indeed a Mottled Owl *Strix virgata* (Cassin, 1849). Therefore, all results and conclusions in the paper pertaining to *L. cristata* refer in fact to *S. virgata*. Both the authors and the Editor in Chief of *Revista Brasileira de Ornitologia* thank readers for noticing this inconsistency and apologize for this misidentification error.
